

## **PRINCIPLES OF RISK ASSESSMENT – 12<sup>TH</sup> MAY 2011**

### **Aims:**

This highly interactive course will examine the legal duty to assess risks and the procedures for identifying, measuring and evaluating these risks. By the end of the course delegates will understand the theory and practice of hazard identification and risk assessment.

Emphasis is placed on the completion of practical risk assessment exercises and delegates will be provided with specimen risk assessment documentation which can be modified for use in their own organisation.

Upon successful completion of the course, delegates will be awarded a Thomas, Carroll Management Services 'Principles of Risk Assessment' Certificate.

### **Who should attend?**

The course is suitable for employees and managers with responsibility for health and safety, as well as health and safety representatives and officers from all branches of commerce and industry.

### **Course duration:**

A half non-residential training workshop

### **Course topics include:**

- The legal duty to assess and manage risks
- The risk assessment process including:
  - Aspects of the workplace, work activities and processes that need assessment
  - Hazards that have the potential to cause harm
  - Persons at risk
  - Adequacy of existing precautions
  - Additional precautions required
  - Requirement for specific risk assessments
- An overview will also be given of the requirements of:
  - Control of Substances Hazardous to Health Regulations
  - Noise at Work Regulations
  - Manual Handling Operations Regulations
  - Display Screen Equipment (Health and Safety) Regulations
  - Personal Protective Equipment at Work Regulations
  - Regulatory Reform (Fire Safety) Order

**Course leaders:** Kevin Price B.Eng, MA (Cantab), PgCERT, CMIOSH MIIRSM  
Rhys Davies BSc (Hons), CMIOSH  
Laura Harris BSc, PGDIP, CMIOSH, MIIRSM
